

Job Description – C++ GUI Development Engineer

Exacq Technologies, Inc.

July 2010

Job Description

Exacq Technologies, a rapidly-growing manufacturer of IP video surveillance software and systems, is seeking to expand its software development staff. Highly skilled and motivated professionals are desired to ensure the continued development of robust, easy-to-use, and high performance video management products.

The GUI development engineer will take the lead on providing a modern, consistent, and performant GUI throughout the exacqVision Client application and across all operating systems. This will entail GUI elements for new features and enhancement of existing elements.

Responsibilities include:

- C++ development of exacqVision Client
- Ensure GUI consistency of existing and new features
- Modernize application look & feel of application
- Increase productivity of application users through new live and search usage paradigms
- Test GUI across all operating systems (Mac, WinXP, Win7, Ubuntu 8.04, Ubuntu 10.04)

Required Skills/Qualifications:

- BS/MS (or equivalent experience) in Computer Science, Electrical or Computer Engineering
- Experience with MFC, wxWidgets, or similar GUI framework
- Experience with multiple Operating Systems (Windows, Linux, Mac)
- Ability to work with minimal supervision

Other desirable skills:

- Experience with Client/Server applications
- Graphic design capability
- Human interface design skills
- Relevant job experience
