

Job Description – C++ Software Engineer

Exacq Technologies, Inc.

July 2010

Job Description

Exacq Technologies, a rapidly-growing manufacturer of IP video surveillance software and systems, is seeking to expand its software development staff. Highly skilled and motivated professionals are desired to ensure the continued development of robust, easy-to-use, and high performance video management products.

The Software Engineer will play an important role in expanding the reach of the exacqVision platform through its integration API by supporting and developing third party products and developers.

Responsibilities include:

- C++ sample code development using exacqVision API and web API
- Develop integrations with third party systems using exacqVision API and web API
- Support third party integrators using exacqVision API and web API
- Test functionality across all operating systems (Mac, WinXP, Win7, Ubuntu 8.04, Ubuntu 10.04)

Required Skills/Qualifications:

- BS/MS Degree in CS, EE, or relevant field
- Expertise in C/C++
- Familiarity with Windows and Linux OS

Other desirable skills:

- Experience with TCP/IP client-server application development
- Experience with digital video
- Experience with cross platform development tools
- Relevant job experience
