## PRESS RELEASE

### **Exacq Technologies Expands Network Surveillance Sales to Canada**

*Toronto area firm will represent physical security software manufacturer in Canadian market*

(INDIANAPOLIS) **Exacq Technologies** ([www.exacq.com](http://www.exacq.com)) is pleased to announce the appointment of **Security Central Marketing** ([www.securitycentral.ca](http://www.securitycentral.ca)) of Milton, Ontario as their newest Manufacturer's Representative to offer the entire line of exacqVision IP surveillance products across Canada. Although exacqVision software and systems have already been installed all over the world, this marks the first time the company has established sales representation outside of the United States.

exacqVision is a robust, full-featured IP (network) NVR (Network Video Recorder) surveillance solution that operates on a pre-configured factory system or off-the-shelf PC hardware. exacqVision utilizes both traditional analog video surveillance cameras and the latest IP cameras, including megapixel models from today's leading manufacturers.

"The demand for IP video surveillance continues to grow throughout the world," notes Dave Underwood, President of Exacq Technologies. "Canada is no exception to this and we believe that Security Central will give us the representation we need to be successful."

Tony Williams, President of Security Central, has over 20 years experience in the security industry working with security integrators and manufacturers. "The exacqVision solution is perfect for the surveillance market today *and* in the future," notes Williams. "Their hybrid systems allow users to utilize the latest IP cameras while keeping their existing analog cameras. Their NVR systems employ the same, easy to use client/server software, which makes their entire line a single, scalable, cost-efficient solution."

#### **ABOUT SECURITY CENTRAL MARKETING**

Security Central Marketing is a Security Manufacturers Representative specializing in integrated access control, alarm, CCTV, and biometric solutions for the Canadian security industry.

#### **ABOUT EXACQ TECHNOLOGIES:**

Based in Indianapolis, Exacq Technologies was created by a group that pioneered the digital video surveillance industry. Exacq Technologies is a manufacturer of IP and hybrid network digital video recording systems, software and OEM products for the security industry.
