<u>**FOR IMMEDIATE RELEASE:**</u>

Tyco Security Products Showcases
Growing Technology Portfolio at Sicurezza 2014

New offerings in intrusion systems, access control hardware and software complement expanding portfolio of HD cameras and recording platforms

HEATHROW, U.K. – 10th November, 2014 – Tyco Security Products, part of Tyco (NYSE: TYC), the world's largest pure-play fire protection and security company, will demonstrate a new slate of innovative technology introductions at Sicurezza 2014, 12 to 14 November, Rho, Milano, on Pavilion 3, Stand E01 G06.

"The growing complexities of the security environment, whether within a large enterprise or at a single location, are demanding intuitive yet sophisticated solutions that allow users to focus on the management of their security department or business," said Phil Dashey, Vice President and General Manager, EMEA, Tyco Security Products. "The seamless unifications between our products enable security personnel to make quick and informed decisions, whilst avoiding integration challenges."

With its expanding video portfolio, Tyco Security Products continues to lead the market in offering a diverse set of high resolution IP camera, recording and video management system (VMS) platforms from its **American Dynamics** and **Exacq Technologies** brands. New from American Dynamics is the **VideoEdge Micro**, a compact version of the popular VideoEdge network video recorder, ideal for small sites with limited space. The new VideoEdge and **victor v4.5 flagship video management system** (VMS) solution brings new analytics capabilities such as heat mapping and POS integration with ease of use functionalities like auto discovery and watermarking.

New from Exacq is the **Easy Connect** automatic IP camera connector feature that allows users to find, address and connect multiple IP cameras to their network automatically. Easy Connect supports IP cameras from Illustra, Axis Communications and Arecont Vision, totaling more than 400 cameras. Exacq is also introducing the **E-Series encoder**, which converts analogue camera video into network video streams for use on exacqVision systems. The latest release of the exacqVision 6.4 VMS introduces VideoPush, which allows users to easily push selected cameras or entire views to another monitor, such as a public display monitor or video wall.

Complementing the array of choices in recording and management platforms is a wide range of HD IP cameras, including the low-cost **Illustra Flex Series**, the **Illustra Compact Mini-Domes** and **Mini-Bullets**, the industry's fastest **Illustra 625 PTZ** and the **Illustra 825 Fisheye**, with onboard de-warping technology.

Headlining the intrusion portfolio for Tyco Security Products is **Bentel Security's** 3.50 release of the **ABSOLUTA intruder alarm control panel,** offering full support via the ABS-IP LAN board for Sur-Gard receiver communications, BOSS programming software for customised email notifications, and ITV2 support for third party integration opportunities. The new **ABSOLUTA M-TOUCH** touchscreen keypad features a 7" full colour display, and the **ABSOLUTA App** enables remote control of ABSOLUTA control panels remotely a smartphone using IP or GPRS connection or SMS commands.

Visonic is introducing **PowerMaster Version 18**, based on the market-leading **PowerG technology** that is the backbone of several new devices, including the **PowerMaster-33** "hidden" panel, **KP-250 two-way wireless keypad,** ultrathin invisible magnetic transmitters, stylish handheld panic buttons and new advanced featured software for the widely installed PM-10 and PM-30 panels. Visonic is also introducing **Tower Cam PG2,** a wireless outdoor PIR that is a perfect solution for visual alarm verification and advanced warning.

Rounding out the intrusion portfolio is **PowerSeries Neo from DSC**, an innovative solution for residential and scalable commercial installations that combines the flexibility of a modular, hardwired system with the simplicity of a wide range of wireless devices and peripherals. PowerSeries Neo leverages the superior capabilities of PowerG – the security industry's leading-edge wireless intrusion technology – and features innovative alarm verification solutions, along with a comprehensive remote service software suite for intuitive management.

CEM Systems will display **emerald^(tm)**, the industry's most multifunctional intelligent touch screen terminal in conjunction with the powerful **AC2000** access control and integrated security management system. AC2000 offers customers a resilient security solution that has the flexibility to be customised and integrated to third party systems to suit project needs.

The **iSTAR Ultra network door controller** from **Software House** uniquely supports traditional hard-wired access control doors and wireless locksets all in the same controller, up to 32 readers. The newest version of the powerful **C•CURE 9000** access control and security management software platform utilises the victor Unified Client from American Dynamics, enabling users to easily view access control events, video, and intrusion alarms from one central user interface or remotely on the go using **C•CURE Go** app.

Rounding out the access control offerings will be the new **Kantech Intevo** integrated security platform, designed to be up and running in minimal time. It includes a customised dashboard for easy system management and is preloaded with Kantech's EntraPass Corporate Edition security management software and exacqVision video management software.
