FOR IMMEDIATE RELEASE:

Illustra Edge Cameras with Onboard exacqVision Software Delivers Complete IP Solution

High definition video as easy as 1-2-3

(INDIANAPOLIS)— Exacq Technologies, part of Tyco, the world's largest pure-play fire protection and security company, announces the introduction of Illustra Edge, a complete high definition video system combining an Illustra IP camera, pre-installed exacqVision video management system (VMS) software and SD card storage into one, out-of-the-box solution. The new Illustra Edge product line provides everything needed to connect and auto-configure in minutes.

Ideal for a small installations of up to 10 cameras — or remote sites where server hardware installations are impractical — the Illustra Edge solution provides an easy, effective means to deploy a high-definition IP video system without incurring separate server hardware installation and configuration costs, since the server software and video storage is onboard the camera. Simply mount the camera, connect and start monitoring live and recorded video. Illustra EDGE comes pre-configured with an included server license for simple, automatic installation. For larger applications and enterprise solutions a simple license upgrade to exacqVision Edge+ makes this solution expandable to unlimited servers.

With the included exacqVision Edge software, users have the ability to view live or recorded video from multiple Illustra Edge devices or server-based recorders simultaneously. The included VMS software allows users to export video search results, display alarm events on screen and get instant replay of both video and audio events via exacqReplay. The exacqVision client software runs on Windows, Linux and Mac computers. Additionally, users can install the free web service software on a separate PC to view video on a web browser, tablet or smartphone.

The Illustra Edge recording solution offers high reliability as there is no single point of server failure. If one camera fails, the others will continue to stream and record video. The camera to server traffic is internal and not on the customer's network providing low overall network traffic.

"This is a complete solution for customers looking to create their own video surveillance solution without added costs of servers and complex installation," said Steve Carney, Senior Director, Product Marketing, Video and Integrations, Tyco Security Products. "Whether it's a small business or retail store, or someone who needs to supplement their enterprise system because of remote locale or intermittent wireless coverage, the Illustra Edge solution can be deployed to fit their needs."

Illustra Edge is available in three camera models: the Illustra Pro 5MP Fisheye, the Illustra Pro 2MP Compact Mini-Dome and Illustra Pro 2MP Compact Mini-Bullet. The Illustra Edge fisheye camera has in-camera dewarping offering real-time 180º/360º panoramic views or a quad view delivering 4 independent 4x3 normalized video streams. Its 5MP capacity gives it the power of two to four cameras for many indoor applications. The Compact Mini-Dome and Mini-Bullet offer high definition video with a wide field of view, IR illumination and wide dynamic range. Although discreet, these versatile cameras are equipped with multiple viewing angles, including corridor mode, making them highly useful for hallways, aisles and alleys.

About Exacq Technologies
Exacq Technologies is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Exacq Technologies (www.exacq.com) designs and manufactures the cross-platform, open-architecture exacqVision video management system (VMS) used in the physical security industry for IP video surveillance. exacqVision is available on factory-installed hybrid and IP camera servers or on commercial off-the-shelf servers. It can also be installed directly on compatible IP cameras, eliminating the need for a separate server. Video from exacqVision servers can be accessed with the free, cross-platform (Windows/Linux/Mac) client, most web browsers and via the free Exacq Mobile app available for iPhone, iPad and Android devices. Exacq's products are available throughout the world via authorized resellers and distributors.

About Tyco Security Products
Tyco Security Products and its leading brands conducts business in over 177 countries around the world, in multiple languages and employs over 2,800 employees globally, including research and development, marketing, manufacturing, sales, service and logistics teams in the Americas, Europe, the Middle East, Africa, and Asia Pacific. Our products, built by developers from all product disciplines, consistently allow customers to see more, do more, and save more across multiple industries and segments including healthcare, government, transportation, finance, retail, commercial and residential.
